

Computaris MVNO in a White Box Solution

Computaris MVNO in a White Box solution is tailored to suit all MVNOs exigencies. It encompasses all services and functionalities required for achieving business goals, making MVNOs accessible to a much broader group of companies and brands and attractive to Mobile Network Operators (MNOs).

- Complete control of your business
- Enhance capabilities for loyalty and churn management
- Rapid and cost efficient creation of unique offers to target underserved niches
- Define innovative pricing models plans and complex tariff models
- Account lifecycle management
- Customer care and service management platform
- Optimize order management across all customers touch-points
- Seamless access to all self-care channels (SMS, USSD, IVR, Web Self-Care)
- Reduce costs by significant component reuse
- Ongoing involvement towards increasing your customer base

Computaris MVNO in a White box solution offers sophisticated control capabilities, enabling integrated management of subscriptions, accounts and billing data, vouchers, phone numbers and SIM cards, providing all the tools needed for a customer centric approach.

Tailored solution for all business models

In contrast with monolithic solutions that cover just partially the functionalities needed by MVNO's business processes, Computaris' open MVNO Solution enables Operators to create and launch innovative services built on standards compliant solutions and leverage the benefits of a wide range of functionalities at a fraction of the cost.

- Modular and extensible architecture, based on standard interfaces
- Careful selection of best of breed solutions
- End to end deployment responsibility
- Seamless integration with MNO Network and 3rd parties
- Carrier grade reliability and scalability
- Fast time to market and low TCO
- Supporting MVNO requirements of multi-tenant functionalities

Best of breed components

Computaris MVNO in a White Box Solution brings together two decades of expertise in the telecommunication industry with top BSS/OSS products. Based on our long term partnerships with leading product companies, Computaris solution incorporates best of breed components for messaging, voice and data session control, voucher management, real time rating and charging smoothly integrated with proven open source business logics such as provisioning, order management, analytics and CRM.
