Streamline The **Patient Eligibility Process** With **Robotic Process Automation (RPA)**
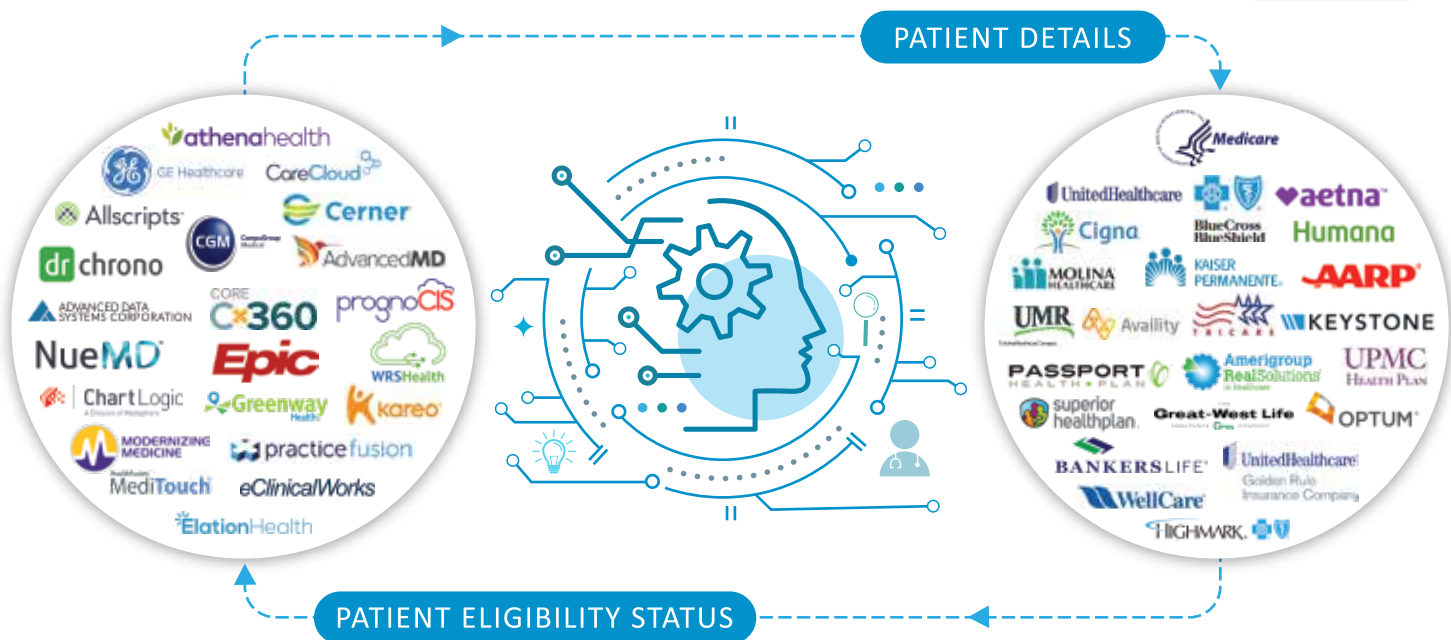

R Systems' cognitive RPA solution leverages advanced ML algorithms to manage end-to-end automation solutions for the patient pre-authorization & eligibility process. Our RPA bot extracts data, confirms eligibility status, and updates your patient app by accessing different payor websites, thus facilitating a smooth workflow, reducing head counts, boosting ROIs, and improving patient care.

Reinvent The **Claim Status Process** With **Cognitive Digital Workforce**

Our AI-powered platform harnesses Machine Learning capabilities to transform into a cognitive digital workforce for handling the process of checking patient's claim status. The platform also ensures complete automation of payor websites & IVR to streamline claim handling process.

Consequently, it helps your organization grow at a much faster speed as your skilled workforce can devote more time towards mission-critical business functions.
