

Data Science Services

Fuel Your Data-driven Growth

R Systems' comprehensive **data science services**, augments and supports your existing in-house data science team, thus enabling you to focus more energy on critical/strategic business initiatives. These services typically fall into the following areas:

MODEL VALIDATION & REFRESH

R Systems' data scientists & engineers, support your team with **operational tasks** like:

- Model Validation
- Model Operationalization
- Periodic Refresh with Current Data
- Documentation
- Performance Metrics

INCORPORATING NEW DATA SOURCES

R Systems, **evaluates & incorporates** new data sources, so you can:

- **Validate** the data quality
- **Assess** the expected predictive value
- **Ensure** consistency with the existing data
- **Deliver** updated models leveraging the new data

OUTSOURCED RESEARCH & DEVELOPMENT

R Systems' **data scientists**, work with your team in an **R&D** capacity to:

- Identify potential (new) use cases and predictive models
- Evaluate the data required to support those models
- Implement short-term POCs to show the true business value

NEW MODEL DEVELOPMENT

R Systems' **Data Science CoE**, will support you with new model development on need-basis, thus providing you additional capacity and scalability you need during times of **high demand**.

R SYSTEMS' DATA SCIENCE (DS) PRACTICE

R Systems' data science team, leverages our **agile DS methodology**, and has deep expertise in:

- Predictive Analytics
- Deep Neural Networks
- Machine Learning
- AI Technologies
