

Rapid & Self-Service Onboarding of WebEDI Suppliers

Business Challenge

Many enterprises conduct business with niche small suppliers and the vision of business leaders is to identify, finalize and start conducting business at short notice. But traditional small supplier onboarding process does not help their initiative leading to painful delays, dissatisfied experience, and loss of business opportunities. R System's WebEDI Supplier Onboarding Framework is an innovative offering that helps enterprises to overcome that challenge by automating the entire onboarding process using Boomi.

R System's WebEDI Supplier Onboarding Framework is a product offering developed using Boomi Integration, B2B/EDI Management, Flow and RPA that enables self-service onboarding of small suppliers through a portal either by supplier themselves or by supplier/business relationship managers without involvement of IT and in few minutes rather than weeks, reducing the supplier onboarding time by more than 90% when compared to traditional methods.

It is a low-cost solution which enables organizations to start conducting business immediately, reach out on R System's for a demo of the product and on how we can implement this solution and realize the ROI within few quarters.

Offering Overview

R Systems has built this product framework using out of the box capabilities of Boomi Integration, B2B/EDI Management, Boomi Flow and RPA. This enables ease of support beyond the accelerated small supplier onboarding. The framework helps to conduct day to day EDI transactions with small suppliers without involvement of VAN. We can leverage existing infrastructure (ex: Supplier Portal) to customize this product to suit individual organization needs (ex: include VAN the overall solution).

Benefits

Rapid and intuitive **self-service on-boarding** in minutes rather than weeks

Eliminate manual errors and no coordination required with IT teams

Productivity improvement to all teams due to process automation

Initiate **business transactions** as soon as onboarding is complete

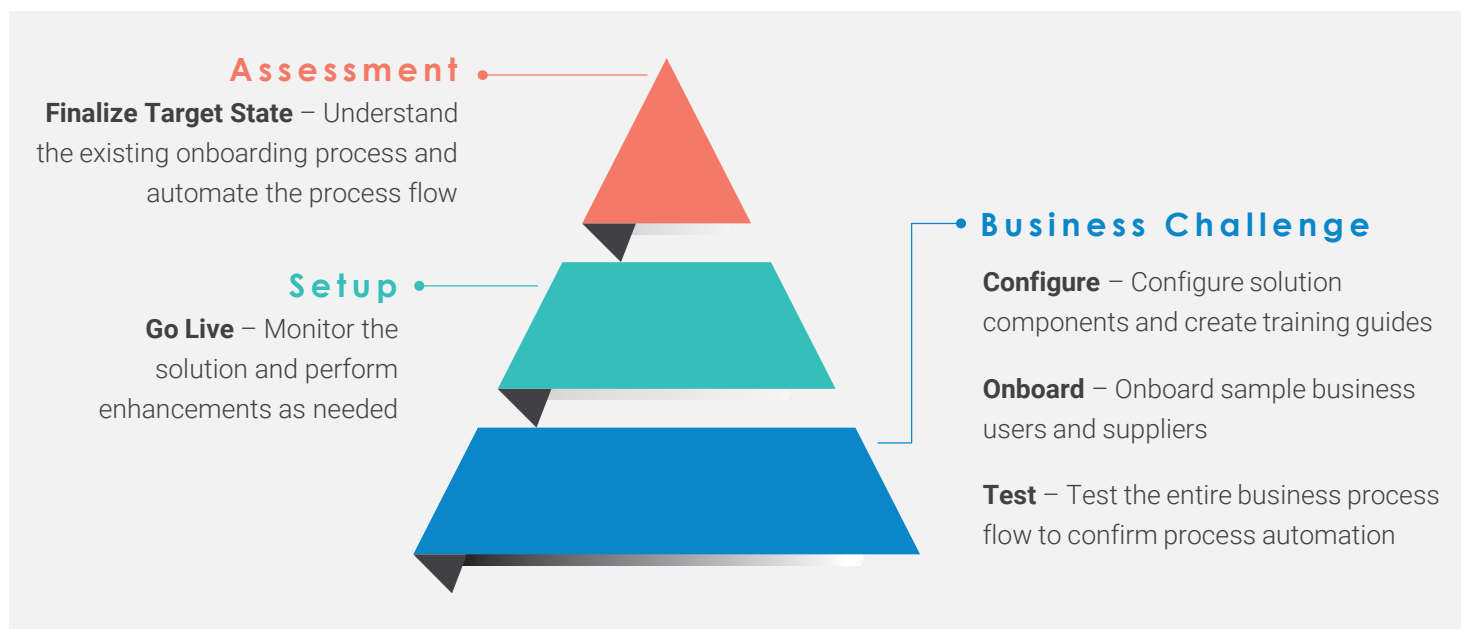

No dependency on VAN eliminating additional cost overheads

Extend the onboarding process to conventional suppliers and legacy suppliers

The solution can also be extended to automate the onboarding of conventional suppliers who have on-premise or cloud EDI solution yielding even more cost optimization. It is a scalable solution that can support small as well as large supplier base. R System can assess your organizations existing processes & recommend the right solution approach.

Business Challenge

If the existing product functionalities meets your needs, then we can start the implementation right away. Else we can identify your target state WebEDI supplier onboarding process in just 4 weeks with R Systems' Quick-Start Assessment program. Our B2B/EDI experts will discuss with your stake holders, identify existing process gaps, and recommend the additional customization required to streamline your process.

R Systems can provide training to your users, support team and suppliers on how to use the solution to maximize the adoption and benefits of the Rapid and Self-Service Onboarding of WebEDI Suppliers framework. We can even automate complementing processes like onboarding or offboarding of business users who use this product there by providing seamless and highly engaging experience.
